

Company Description

With \$1,039 billion of assets under management globally as of December 31, 2014, Deutsche Asset & Wealth Management is one of the world's largest investment organizations. We help individuals and institutions worldwide with products and services designed to grow and protect their wealth, by offering traditional and alternative investments across all major asset classes. We also provide customized wealth management solutions and private banking services to high-net-worth individuals and families.
